

# What's your soul color?

We all give off energy, or auras, says Pamala Oslie, author of *Life Colors*. "The color in your aura is your soul color, and it reveals clues to your personality!"

## If you . . .

- ☐ Enjoy helping others and volunteering in your community
- ☐ Are especially independent and relish your freedom
- ☐ Have a knack for teaching and excel in leadership roles

## Your soul color is **Violet!**

Idealistic and driven, you're a true humanitarian. "Violets are visionaries," says Oslie. "They're leaders destined to make their mark." And if your mark starts at home, all the better: You believe every worthwhile change begins locally, radiating ripples of good karma outward.

## If you . . .

- ☐ Often find yourself counseling and nurturing others
- ☐ Consider home, family and spirituality among your top priorities
- ☐ Are uncommonly loyal and thrive in committed relationships

## Your soul color is

## **Blue!**

Like a cloudless summer sky, you are truly serene. "People with blue soul colors are intuitive, emotional caretakers," observes Oslie. "They are the heart of their family." Simply put, home is your castle, and you're the queen of it.

## If you . . .

- ☐ Wear your emotions on your sleeve
- ☐ Tend to be strong-willed and have a bit of a stubborn streak
- ☐ Express yourself passionately

## Your soul color is **Red!**

You feel things with your whole heart and radiate an almost electric charisma. "Dancers, singers and performers often have red soul colors and tend to be very sensual," says Oslie. Outgoing and sociable, you have a fiery passion for life that translates into a powerful and alluring personality.

## If you . . .

- ☐ Are ambitious and very strong-willed
- ☐ Dream of running your own business
- ☐ Can be a bit of a perfectionist and are sometimes hard on yourself

## Your soul color is

## **Green!**

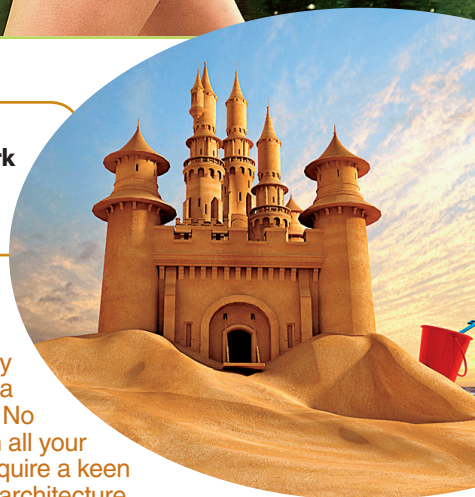

Super-smart and internally motivated, you're constantly striving to beat your own personal best in everything from career matters to gourmet cooking and are a natural entrepreneur. "You're a born CEO and big-picture thinker able to make the kinds of decisions that'll lead to long-term success," says Oslie.

## If you . . .

- ☐ Tend to be logical and analytical
- ☐ Enjoy examining how things work and exploring new technology
- ☐ Are extremely observant and detail-oriented

## Your soul color is **Tan!**

Down-to-earth and utterly focused, you tackle challenges systematically and methodically and have earned a reputation for ace problem-solving. No wonder you tend to be a success in all your endeavors, especially those that require a keen eye for detail, from bookkeeping to architecture.

## If you . . .

- ☐ Have a playful wit and laugh easily
- ☐ Love being creative and working with your hands
- ☐ Feel most relaxed outdoors in nature

## Your soul color is **Yellow!**

"People with a yellow soul color are like big kids," says Oslie. "Playful and creative, they flourish in environments that let their imaginations run wild and are often designers, chefs and artists." Fun-loving and vivacious, you bring a sunny spirit and childlike curiosity to everything you do—no wonder your *joie de vivre* is so infectious!
